**Answer 6.(a)**

Mr. Ram did not become the managing director of the company for the mere reason that his family had purchased considerable shares in the firm. He was elected as a managing director by the board of directors. He has received his salary for his personal services. It is not material to hold that he was elected managing director on behalf of the family. He was not appointed as managing director as a result of any outlay or expenditure of or detriment to the family property. Further, the managing directorship was an employment of personal responsibility and ability. Hence, such remuneration shall be considered as his personal income. The same view was upheld by the Apex Court in the case of Raj Kumar Singh Hukam Chandji –vs.– CIT.
