Answer:

Statutory Reserves are those reserves, which are created as per the particular statute/law, under that law, the reserve is created and this law puts some restriction on utilisation and maintenance of reserves for a particular period.

- Separate accounting adjustment/entry is not required for statutory reserves in the case of merger as all reserves are also recorded in the transferee book including statutory reserves.
- However in case of amalgamation by way of purchase, the reserves being internal liabilities, are not recorded in the books of transferee.
- Therefore in the case of purchase to comply with the requirements of particular statute, the statutory reserves created in the books of transferor company is to be maintained for some more years in the transferee company books. As per the standard to fulfill the requirement of maintenance of statutory reserves the transferee company shall record the statutory reserves in its books by debiting to Amalgamation Adjustment Account and crediting Statutory Reserve.
- Amalgamation adjustment account shall be disclosed in balance sheet under the head of Non-current assets subhead "Other non-current assets" and statutory reserves under the head "Reserves and surplus".

(d)(i) Discuss the advantages of preparation of Value Added (VA) statements.

[6]

Answer:

Various advantages of preparation of Value Added (VA) Statements are as under:

- Reporting on VA improves the attitude of employees towards their employing companies. This is because the VA statement reflects a broader view of the company's objectives and responsibilities.
- VA statement makes it easier for the company to introduce a productivity linked bonus scheme for employees based on VA. The employees may be given productivity bonus on the basis of VA / Payroll Ratio.
- VA based ratios (e.g. VA / Payroll, taxation / VA, VA / Sales etc.) are useful diagnostic and predictive tools. Trends in VA ratios, comparisons with other companies and international comparisons may be useful.
- VA provides a very good measure of the size and importance of a company. To use sales figure or capital employed figures as a basis for company's rankings can cause distortion. This is because sales may be inflated by large bought-in expenses or a capital-intensive company with a few employees may appear to be more important than a highly skilled labour-intensive company.
- VA statement links a company's financial accounts to national income. A company's VA indicates the company's contribution to national income.
- VA statement is built on the basic conceptual foundations which are currently accepted in balance sheets and income statements. Concepts such as going concern, matching, consistency and substance over form are equally applicable to VA statement.
- (ii) Mithila grants 120 share options to each of its 240 employees. Each grant is conditional on the employee working for Mithila over the next three years. Mithila has estimated that the fair value of each share option is ₹24.

Everything turns out exactly as expected.

Calculate the amounts to be recognised as expense during the vesting period.

Answer:

2	(28,800 options × 75% × ₹24 × 2/3 years) – 1,72,800	1,72,800	3,45,600

Question No. 5 (Answer any three):

- (a) Identify the differences between Commercial Accounting and Government Accounting.

(b) Discuss the scope of IGAS-3 on Cash Flow Statements.

- [5]
- (c) Describe how the Public Accounts Committee regularize the excess expenditure spent on a service. [5]
- (d) List the responsibilities of the Government Accounting Standards Advisory Board. [5]

Answer:

- (a) The principles of Commercial and Government Accounting differ in certain essential points. The difference is due to the fact that, while the main function of a commercial concern is to take part in the production, manufacture or inter-change of goods or commodities between different groups or individuals and thereby to make profit, Government is to govern a country and, in connection therewith, to administer the several departments of its activities in the best way possible.
 - Government Accounts are designed to enable Government to determine how little money it need take out of the pockets of the tax-payers in order to maintain its necessary activities at the proper standard of efficiency. Non-Government Commercial accounts, on the other hand, are meant to show how much money the concern can put into the pockets of the proprietors consistently with the maintenance of a profit-earning standard in the concern.
- (b) The cash flow statement should be presented as an integral part of Financial Statements of the Union and State Governments for each period for which such Financial Statements are presented. It should be prepared in accordance with the requirements of this Standard. The Financial Statements should not be described as complying with this Standard unless they comply with all its requirements. The transactions that do not require the use of cash or cash equivalents (non-cash transactions) should be excluded from a cash flow statement
 - Information about cash flows may be useful to users of the Government Financial Statements in assessing its cash flows and assessing compliance with legislation and regulations (including authorized budgets where appropriate). Accordingly this Standard requires Governments to present a cash flow statement.
 - Some activities undertaken by Government do not have direct impact on their current cash flows. The exclusion of non-cash transactions from the cash flow statement is consistent with the objective of a cash flow statement as these items do not involve cash flows in the current period. Examples of non-cash transactions include accounting for interest payable on provident fund deposits of employees, conversion of debt into equity of an entity. Summary and impact of such non-cash transactions should be disclosed in the notes to Cash Flow Statement forming part of the Financial Statements in a way that provides all the relevant information about these activities.
- (c) If any money has been spent on a service in excess of the amount granted by the House for the purpose, the Committee examines the same with reference to the facts of each case, the circumstances leading to such an excess and make such recommendations as it may deem fit. Such excesses are thereafter required to be brought up before the House by Government for regularisation in the manner envisaged in article 115 of the Constitution. In order to facilitate speedy regularisation of such expenditure by Parliament, the Committee presents a consolidated report relating to all Ministries/ Departments expeditiously in advance of other reports.
- (d) Following are the responsibilities of the Government Accounting Standards Advisory Board:
 - (i) To establish and improve standard of Government accounting and financial reporting in order to enhance accountability mechanisms.
 - (ii) To formulate and propose standards that improve the usefulness of financial reports based on the needs of the users.
 - (iii) To keep the standards current and reflect change in the Governmental environment;

- (iv) To provide guidance on implementation of standards.
- (v) To consider significant areas of accounting and financial reporting that can be improved through the standard setting process.
- (vi) To improve the common understanding of the common understanding of the nature and purpose of information contained in the financial reports.
